## Implant Abutment System

There are several systems in the implantation practice on the market, all of them have advantages and disadvantages as well. It is often difficult to decide which one is worth investing in.

We are trying to help with this problem with our „UNIFORM” system, which enables us to achieve the same goals, with other proven systems and existing proven tools, but at a much more favorable price. Our UNIFORM abutments are designed to fit perfectly with the compatible systems and instruments as well.

**There is a wide range of abutment selection, whose connection can be selected according to the desired system.**

## About the company

**BIONIKA** Medline Orvostechikai Kft. Is a member of the Swedish-Hungarian group of companies. It was founded in 1989. The owners of the company are Swedish and Hungarian citizens. We have a 35-year-experience in the field of medical instruments and implant development, production and trade.

BIONIKA as a researcher, developer, manufacturer and distributor is present in dentistry, oral surgery, traumatology, orthopedics and rehabilitation in the medical-professional areas. According to our objective and perception, we attach great importance to the word „BIONIKA”, which marks a scientific thinking on the boundaries of biology, technology and electronics that combines these three areas in our researching and developing work

**Clinical and technological experiences:** The continuous process, combination and utilization of clinical and technological experiences in development contributes to our success, up to the production base. Here you will find the best solutions and constructions suited to customer needs, which are under continuous development.

**Development:** The owners of BIONIKA put great emphasis on continuous product and technological research and development. Our products are developed in close collaboration with doctors and engineers, enabling us to ensure the world-class quality and practical utilization.

**Quality:** The quality of the products expected by our customers is guaranteed by design, manufacturing and quality management according to the harmonized European Union laws. The BIONIKA Medline Kft. is operated according to the EN ISO 9001 and the EN ISO 13485 quality management system. Our products are provided with CE marks.

**Guarantee:** After inserting the implant - the risk of the ossification process is assumed by BIONIKA, independently of cause and effect relationship – exchange guarantee is ensured within one year after the purchase. Otherwise, we provide a long-term, 10-year guarantee for our products.

### Applied materials

**BIONIKA demonstrates the best qualities of Grade 5 titanium used in implant manufacturing for dental implantology according to the ISO 5832-3 standard.** Due to its adequate purity the biocompatibility is exceptionally good as well as it is provided with exceptional solidity. The titanium applied according to the standard is provided with exceptional biocompatibility, it is almost risk-free. Our abutments can be made of Co-Cr material and POM or PEEK materials are applied in the case of plastic heads.
