# WELCOME

Dental implant professionals can choose from hundreds of dental implant systems in Hungary and thousands of dental implant systems worldwide. Even today, the big question is

„How can we find the perfect system for us?“ Dental implants differ mainly in material, design, surface treatment, size and connection. Trying out new systems can be a time-consuming process and often financially demanding. While it is not easy to navigate the wide range of products, there are certain professional standards that can be met to ensure successful implant surgery.

## To whom do we recommend BIONIKA products?

- To those who want to work with reliable products with a guarantee and CE mark, which comply with the requirements of the MSZ EN ISO 13485-2016 standard and Annex 2 of the EüM Decree 4/2009 (17.III.). We offer a 10-year warranty on the implants we manufacture, which means that we will replace them free of charge in the event of material defects. Furthermore, to whom it is important that medical devices are made of biocompatible materials from a reliable source with a mill test certificate.
- To those who need a unique, tailor-made implant or abutment at short notice for a successful procedure.
- To those who are looking for a cost-effective solution and to whom price is an important factor alongside high quality. BIONIKA's main goal is to offer its partners excellent Hungarian products combined with world-renowned Hungarian engineering knowledge.
